

Toilybayeva Akzhibek

Preschool Education MA student

Kazakh National Women's Teacher Training University

Almaty, Kazakhstan

2025/26 autumn term

Why did you come to the Faculty of Education for Children and Special Educational Needs of the University of Debrecen, Hungary? What made you want to study in Hajdúböszörmény?

I chose the University of Debrecen because my home university had recently signed a memorandum of cooperation with the University of Debrecen. There was nothing to hide about this choice — it was an opportunity that appeared at the right time. I decided to come, and I have never regretted this decision.

Studying in Hajdúböszörmény was especially interesting for me because this city has a strong educational tradition and a calm, student-friendly atmosphere which helped me fully concentrate on my studies and personal development.

What did you study here?

At the Faculty of Education for Children and Special Educational Needs, I studied subjects related to preschool and special education, inclusive teaching methods and modern pedagogical approaches. Many of the courses were practice-oriented and helped me understand how theory can be applied in real classrooms.

Tell us about your best experience at our University / in Hungary.

My best experience was the opportunity to exchange professional experience with professors almost as equal colleagues. The teachers treated us with great respect and encouraged open discussion and critical thinking.

I also really appreciated that most lessons were focused on practical activities rather than only theory. This made learning more meaningful and useful for my future profession.

Another unforgettable experience was living in Hungary itself — discovering Hungarian culture, making international friends and becoming more independent.

What was your worst experience during your Erasmus?

Honestly, I did not have any really bad experiences during my Erasmus period. Of course, there were small difficulties and adaptation problems at the beginning, but now I have already forgotten them because they were not significant compared to all the positive moments.

I will never forget ...

I will never forget the day when we accidentally took the wrong bus on our way to university. At that moment it seemed like a problem, but later it became a funny memory that we still laugh about.

I will also never forget the warm attitude of the professors, the international atmosphere of the university and the feeling that I was part of a big academic family.
